EXPERIENCE

Realm, San Francisco — Technical Product Manager

January 2016 - Present

- I own the front end development quarterly roadmap, dependency identification, product design, resource planning activities and deliverables for the web/mobile engineering. This resulted in Realm deployed on 2 billion devices via [realm.io](#) and [cloud.realm.io](#).
- Triaged, launched, and supported live production applications with 800k+ monthly visitors.
- Established design system performance metrics and key customer/market research questions to gather customer insights and inform online lead gen optimization or new product development.

Camio, San Francisco — Senior Product Manager

October 2013 - December 2015

- I advocated for and drove product design features with agile product development for our iOS, Android, and Web applications used by over 550k developers.
- Managed the software development cycle (product strategy, market analysis, requirement gathering, user stories, wireframing, user testing, design, implementation, QA, release, maintenance, data analysis, and improvement)
- Reduced number of support related to onboarding by 80% by conducting a series of usability tests and data analysis and re-designing the user onboarding process

Eko Devices, Berkeley — Technical Product Manager

September 2011 - October 2013

Eko was named Time Magazine's top 25 inventions in 2015.

OneCal, Berkeley — Product Developer

December 2009 - September 2011

Collaborated with teammates to design the initial strategy and roadmap.

EDUCATION

UC Berkeley — Bachelors of Science, Economics & EECS

SKILLS

Product management: Agile Software Development, Launch Readiness, Process Development / Improvement, Business Intelligence, Software Engineering, UX/UI

Fluent in: Ruby, HTML5, SASS, jQuery, Sketch, Framer, and Photoshop

Passionate about: Front-end Development, Product Accessibility, mobile product design, SVGs, and base64 image compression

AWARDS

Founder.org - Class of 2013

Congressional Award Program - Silver Medal, Class of 2009

PERSONAL PROJECTS

Plot.io — Get video and text feedback from your users in your product

Instadiff — Compare website versions with highlighted changes before you deploy
